***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-61, 108-214, 249-250, drawn to a method and system of functional brain mapping, classified in class 600, subclass 476.
- II. Claims 62-107, 215-246, 248, 251, drawn to a method and system of generating an oxygen saturation and/or blood volume difference map of tissue, classified in class 600, subclass 476.
- III. Claim 247, drawn to a system for functional brain mapping, classified in class 600, subclass 407.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions in that the invention of group I is directed to acquiring a functional map of the brain while the invention of group II is directed to acquiring an oxygen saturation and/or blood volume difference map of any tissue.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require both a functional map and an anatomical image. The subcombination has separate utility such as one that does not include analyzing the results of a stimulus on the brain function.

Because these inventions are distinct for the reasons given above and the search required for each individual group is not required for any other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
